Jennifer Lo

Applied AI and analytics leader

LinkedIn

Applied AI and analytics leader with 7+ years of experience leading global enterprise AI adoption, analytics modernization, and automation. Experienced in identifying high-value AI opportunities, governing enterprise platforms, and delivering solutions that improve operational efficiency and decision-making. A creative, adaptable and detail-oriented problem solver who enjoys learning, exploring new technologies, and communicating ideas.

EXPERIENCE

AI Manager and Product Owner · Brookfield – Technology Services

Nov 2024 – Dec 2025 · New York, United States

- Established and executed enterprise-wide adoption and governance of AI tools, managing admin, user onboarding, training, billing, governance, troubleshooting and consultation
- ChatGPT: led the enterprise rollout to 1,000+ users from Apr to Sep 2025, from rollout planning and options for executives to custom GPTs and connectors, with ongoing enablement and support for responsible AI adoption
- ToltIQ (formerly DiligentIQ): enabled 600+ investments and private equity users to speed up due diligence from Feb 2025 through onboarding, training, prompt consultation, a prompt library, knowledge sharing and adoption work with team leads
- Amazon Q Business: enabled 100+ users across HR, audit, finance and tax from Nov 2024, set up team environments and RAG data sources, built Q apps for maternity leave payroll, resume matching and audit report editing, and shaped features with Amazon engineers
- Scribe: enabled 100+ users on a modernized documentation and sharing tool from Dec 2024
- Led 100+ technical and educational demos, establishing and presenting best practices and prompt engineering to raise AI literacy and adoption across business groups and levels of staff
- Participated in and contributed to organization-wide, local and global AI-VCO objectives and initiatives, providing and collating quarterly updates, use case and progress tracking
- Partnered with Amazon and PwC on AI solutions for corporate functions: agentic invoice redaction for HR accounts payable, a PowerApp pre-meeting report generator using Salesforce and Preqin data, and AI-extracted questionnaire responses for compliance

SKILLS

AI Platforms

ChatGPT Enterprise, Amazon Q Business, ToltIQ, Copilot Studio, PowerApps, Claude, Claude Code, Codex, n8n, Gemini

AI Concepts

Prompt Engineering, Retrieval Augmented Generation (RAG), Agentic AI, AI Assisted Development & Prototyping, AI Governance, Adoption & Best Practices

Automations

UiPath, Alteryx

Data Analytics & Visualization

Alteryx, Snowflake, Tableau, Power BI, Python, SQL, VBA, ACL

Certificates

OpenAI Applied AI Foundations, OpenAI Agents & Workflows, Claude 101, Claude Code 101

EDUCATION

University of Waterloo, Canada

Bachelor of Computing and Financial Management

Sep 2013 – Apr 2018

Computer Science and Finance double major

- Drove organization-wide AI value creation by collecting and prioritizing use cases, gathering requirements with leads, delivering proofs of concept, and assessing viability and alignment with business strategy
- Snowflake x AWS hackathon: built a Streamlit app and retrieval agent on Cortex Analyst and AWS Bedrock, letting underwriters query structured and unstructured real estate investment data in natural language

RPA Developer · Brookfield – Technology Services

Aug 2024 – Nov 2024 · New York, United States

- Deployed automations with UiPath to reduce manual processes and increase accuracy in document processing and quarterly reporting
- Updated the existing legal document ingestion automation for two new document formats
- Automated the quarterly rollover of financial statement trackers
- Troubleshot and resolved ad-hoc production automation failures
- Authored runbooks and documentation for knowledge transfer and compliance
- Refactored and maintained data remediation Python code for Relito

Data Analytics and Visualization Manager · Brookfield – Internal Audit

Nov 2022 – Jul 2024 · New York and Sydney

- Migrated legacy audit processes to Alteryx, enabling up-to-date, metric-based, scalable self-service compliance reporting
- Redesigned Tableau dashboards for APAC T&E and accounts payable, giving C-suite reviews visibility into compliance trends and risks
- Delivered analytics with Alteryx, Tableau and Power BI to support real estate audits and executive reporting

Data Analytics and Visualization Manager / Senior Analyst / Analyst · Brookfield – Internal Audit

Sep 2018 – Nov 2022 · Toronto, Canada

- Led and delivered enterprise audit analytics with Alteryx, Tableau, VBA and ACL: compliance monitoring, anti-bribery and corruption reviews, journal entry reconciliations, and routine and ad-hoc audit insights
- Drove modernization of analytics functions, enabling adoption of new methodologies, automations and tools across internal audit teams
