Jennifer Lo

Applied AI and analytics leader

LinkedIn

Applied AI and analytics leader with 7+ years of experience leading global enterprise AI adoption, analytics modernization, and automation. Experienced in identifying high-value AI opportunities, governing enterprise platforms, and delivering solutions that improve operational efficiency and decision-making.

EXPERIENCE

AI Manager and Product Owner · Brookfield – Technology Services

Nov 2024 – Dec 2025 · New York, United States

- Established and executed enterprise-wide adoption and governance of AI tools, managing admin, user onboarding, training, billing, governance, troubleshooting and consultation
- ChatGPT: led the enterprise rollout to 1,000+ users from Apr to Sep 2025, with ongoing enablement programs and support processes accelerating responsible enterprise AI adoption
- ToltIQ: enabled 600+ investments and private equity users to increase due diligence efficiency from Feb 2025, with onboarding, training, prompt writing, a prompt library, knowledge sharing and feature request sessions
- Amazon Q Business: enabled 100+ users across HR, audit, finance and tax from Nov 2024, setting up team environments and RAG data sources, building Q apps like a resume match analysis and audit report editor, and working with Amazon engineers on features
- Scribe: enabled 100+ users on a modernized documentation and sharing tool from Dec 2024
- Led 100+ technical and educational demos, establishing and presenting best practices and prompt engineering to raise AI literacy and adoption across business groups and levels of staff
- Participated in and contributed to organization-wide, local and global AI-VCO objectives and initiatives, providing and collating quarterly updates, use case and progress tracking
- Partnered with Amazon and PwC on AI solutions for corporate functions: agentic HR invoice redaction and processing, a PowerApp pre-meeting report generator using Salesforce and Preqin data, and a due diligence questionnaire assistant
- Drove organization-wide AI value creation by prioritizing use cases, requirements gathering and documentation, delivering proofs of concept, and assessing viability and business alignment
